

## OUTDOOR LIVING

The Eureka Conservatory Awning is a temporary roof style awning, especially designed for outdoor entertainment spaces for both residential and commercial buildings alike. These awnings can be fitted to an existing frame, or we can supply and install the awning and the frame for you. Eureka Awnings are motorised by Wynmotion for ease of use.

# TECHNICAL INFORMATION

## Operation

The Eureka Awning is motorised by Wynmotion, controlled using a remote, or connected to a Smart Home System. It runs on guides and retracts into a headbox.

## Size

The Awning can be manufactured with a width of up to 5 metres and a projection of up to 5.5 metres, making it ideal for covering outdoor entertaining areas or conservatories. Multiple Awnings can also be installed side by side, utilising shared posts up to a maximum combined width of 15 metres.

## Fabric

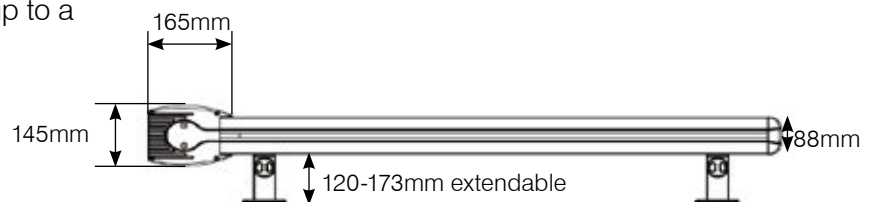

Only available in Acrylic fabric.

## Hardware Colour

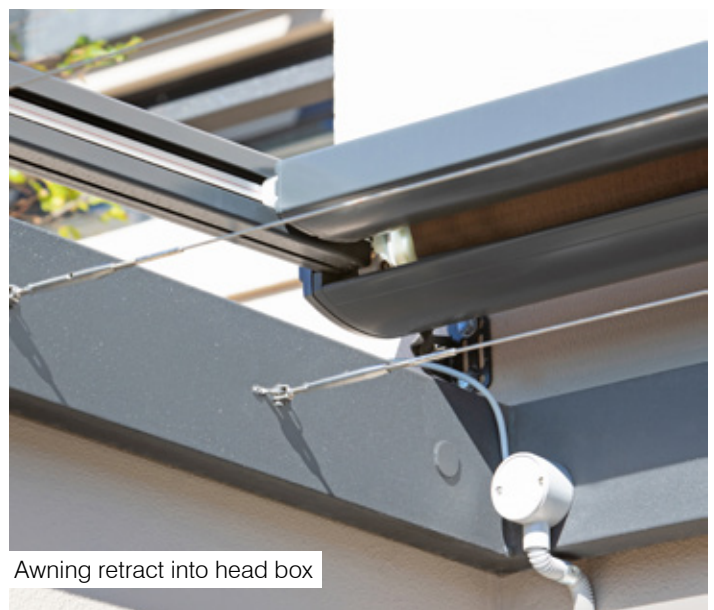

The standard hardware colours for the track and headbox are **White** and **Granite**.

## Strength

The Eureka Awning uses a high tension system of belts and springs, ensuring the traction and tension of the fabric remain constant in any position.\*\*

# BENEFITS

Awning retract into head box

## Retracts into Headbox

When retracted, the Awning is discretely concealed in a headbox, protecting the fabric and giving you complete control of light and shade.

## Flexible Installation

The awning does not rely on the same solid fixing points as Folding Arm Awnings, making it more flexible to install with more options than a conventional Folding Arm Awning, particularly on a single storey dwelling.

## Satisfaction Guaranteed

Quality installation is assured with our specialist team, and peace of mind with a Wynstan 3 Year Warranty\*.

\*For more information about our Wynstan 3 year warranty, please see our Warranty & Care Guide manual.

\*\* It is advised that your awnings not be left out during strong winds, nor when your home is unoccupied.
